### Incident Report #17768

Title:	broken Lipo battery fire hazard
Logged By:	Van Luven, Devon Mr.
Logged On:	1/26/2026 12:16:34 AM
Occured on:	1/26/2026 12:16:34 AM
Status:	Open
Related Unit:	N/A
Reported By:	SG Devon
Suspect:	
Type:	Fire & Fire Hazards
Details:	At approximately 11:38 pm on January 25th, 2026. SG Devon was conducting a ground-floor patrol and discovered a failing LiPo battery pack in the recycling room, which posed an immediate fire hazard. SG used a metal tin to safely contain the battery during removal from the building. SG could not leave through the elevator north lobby door, as snow was blocking the way. SG exited through the west entrance and went to the north canopy to store the battery as safely as possible outside until it can be disposed of properly. SG notified SI Rafael of the situation. This report was made to inform management. End of report
